

Daily Operations & Site Progress Report

Mucheru World of Golf Dam 3 excavation kickoff, soil stripping on Greens 18, 11, 12 & 17, precision green marking & Farm 3 boundary fence shifting; Chaka Farms dairy yield, livestock health report & canine multi-species animal socialization; Amani Cottage front lawn sprinkler irrigation.

DAM HAULAGE TRIPS

65 Trips

Excavated topsoil transport

HEAVY MACHINERY RUN

14h 00m Total

Excavator: 7h 00m |
Loader: 7h 00m

CHAKA DAIRY YIELD

6.0 Litres

Morning: 4.0L | Evening:
2.0L

GREENS CLEARED & MARKED

4 Greens

Active

Greens 18, 11, 12 & 17 +
Farm 3 Fence

1. Mucheru World of Golf — Dam 3 Excavation, Greens Earthworks, Marking & Fencing

Kickoff of Dam 3 reservoir excavation, overburden clearance on Greens 18, 11, 12 & 17, internal road levelling, precision green survey marking & Farm 3 fence relocation

Overseen by: Mr. Gichuhi & Ken

🚧 Dam 3 Excavation Kickoff & Heavy Machinery Deployment

- **Commencement of Dam 3 Reservoir Excavation:** Heavy excavation operations officially broke ground on **Dam 3**. The hydraulic excavator (Sunward SWE210) initiated bulk soil extraction to establish the perimeter rim, embankment slopes, and reservoir basin depth.
- **Topsoil Stripping & Tipper Haulage (65 Total Trips):** Excavated topsoil and overburden were loaded onto tipper lorries to clear the basin footprint and transport material across designated course levelling zones, completing **65 haulage trips**.
- **Heavy Machinery Deployment (14 Total Hours):** High-capacity machinery operated at full capacity throughout the day, with the hydraulic excavator running for **7 hours** and the front loader/backhoe operating for **7 hours**.
- **Old Roads & Uneven Ground Levelling (Supervised by Joe):** The XGMA front loader/backhoe carried out extensive grading across historical course pathways and uneven terrain, pushing and distributing soil mounds to create smooth fairway transitions.
- **Chaka Farm 3 Boundary Fence Posts Placement:** Treated wooden posts and straining timber poles were transported and placed into position along the boundary line of **Chaka Farm 3** in preparation for shifting and securing the property perimeter fence.

EQUIPMENT / RESOURCE	OPERATING TIME / VOLUME	OPERATIONAL SCOPE & ACTIVITY
Hydraulic Excavator	7 Hours 00 Minutes	Dam 3 basin excavation, reservoir groundbreaking & tipper loading
Front Loader / Backhoe	7 Hours 00 Minutes	Soil levelling on old golf course roads & uneven ground grading
Tipper Lorry Haulage	65 Total Trips	Haulage and relocation of excavated earth and topsoil across course

Major Milestone: Dam 3 Excavation Officially Underway

Groundbreaking and bulk earthmoving for the third water storage reservoir (Dam 3) commenced smoothly, expanding the course's overall water conservation capacity.

Greens Soil Clearance (Greens 18, 11, 12, 17) & Survey Grid Marking

- **Overburden Soil Clearance on 4 Greens:** Ground crews and earthmoving equipment systematically stripped and cleared excess topsoil from the foundation footprints of **Green No. 18**, **Green No. 11**, **Green No. 12**, and **Green No. 17** down to the design sub-base levels.
- **Precision Survey Layout & Stringlining:** Guided by architectural master drawings, field teams set up alignment strings and elevation survey stakes across the levelled green footprints.
- **Chalk Contour & Grid Marking (Overseen by Mr. Gichuhi):** White lime chalk was applied to establish the exact putting surface geometries, green collars, and drainage contours on **Green No. 18** and **Green No. 11**, ready for sub-base rock foundation laying.

Mucheru World of Golf Video Documentation

Dam 3: Excavation Commences & Groundbreaking

Greens: Removing Extra Soil & Clearing for Marking

Logistics: Boundary Fence Timber Posts for Farm 3

Mucheru World of Golf Visual Documentation

Dam 3 Reservoir Basin Groundbreaking

Sunward hydraulic excavator actively carving out the basin floor and banks of the new Dam 3 reservoir.

Dam 3 Topsoil Stripping & Truck Loading

Excavator loading stripped topsoil into a yellow tipper lorry across the open course ground at Dam 3.

Dam 3 Basin Profile Shaping

Elevated perspective of the excavated reservoir basin bowl with fresh earth mounds and haulage trucks on site.

Course Soil Levelling (Supervised by Joe)

XGMA backhoe loader smoothing rough ground profile with site supervisor Joe overseeing elevation grading.

Internal Roadway & Uneven Ground Grading

Backhoe bucket pushing and levelling heavy soil heaps along old internal golf course roadway corridors.

Pathway Levelling Adjacent to Green Foundations

Grading of internal access route running alongside newly established red soil and stone green foundations.

Mr. Gichuhi Overseeing Green Marking Setup

Mr. Gichuhi (in white cap) photographing survey teams using alignment stringlines and wheelbarrows on the cleared green.

Survey Stringlines & Grid Layout

Ground crews carefully pulling measuring lines and positioning survey pegs across the graded green bed.

Green Survey Grid Chalking

Uniform grid layout marked with white lime chalk to define contours and foundation levels on the putting surface.

Putting Green Perimeter & Contour Outlines

Complete putting green geometry and perimeter boundary clearly chalked on the levelled earth bed.

Chalk Grid Intersection Detail

Close-up view of intersecting chalk reference lines and guide stakes establishing the putting green layout.

Chaka Farm 3 Boundary Fence Post Alignment

Treated timber posts and corner straining poles positioned along the boundary line for fence shifting operations.

2. Chaka Farms — Dairy Milking Yield, Livestock Health & Canine Training

Daily milk production logs, goat kid mortality update, canine manners & multi-species animal socialization (goats & chickens)

Dairy Production & Livestock Health Log

Overseen by: **Kamandau**

- **Morning & Evening Milking Logs:** Daily milking completed smoothly under Kamandau's supervision, recording a total yield of **6.0 Litres** of fresh milk (Morning: 4.0 Litres | Evening: 2.0 Litres).
- **Livestock Mortality & Veterinary Report:** A goat kid was found dead in the morning. The kid had been attended to and treated by a veterinary professional on the previous day (Saturday).

PRODUCTION SESSION	MORNING MILKING	EVENING MILKING	TOTAL DAILY YIELD
Fresh Milk Yield	4.0 Litres	2.0 Litres	6.0 Litres

Canine Unit Care, Advanced Obedience & Livestock Socialization

Overseen by: **Willy**

- **Kennel Cleaning & Morning Protocols:** Thorough washing, disinfection, and drying of all canine accommodation runs and sleeping stalls.
- **Kennel Manners & Impulse Control:** Exemplary boundary manners strictly observed by all dogs, holding steady sit-stays before door opening and food bowl presentation.
- **Paw Commands, Patience & Obedience Drills:** Intensive skill sessions focusing on paw gestures, focused attention, recall drills, and extended impulse control with highly positive responses from all dogs.
- **Pasture Off-Leash Walking & Goat Socialization:** The dogs enjoyed structured off-leash field walking, maintaining calm proximity and relaxed demeanor while socializing alongside pastured goats.
- **Socialization with Free-Range Chickens:** Controlled exposure training conducted with farm chickens; the dogs displayed complete composure, non-reactivity, and gentle curiosity under Willy's guidance.

 **Canine Unit: Off-Leash Field Walking & Pack Exercise** 

 **Livestock Socialization: Calm Off-Leash Walking with Goats** 

 **Farm Animal Socialization: Disciplined Interaction with Chickens** 

Chaka Farms Visual Documentation

Livestock Mortality — Deceased Goat Kid

Goat kid found deceased in the morning near the shelter wall following veterinary medical intervention on Saturday.

3. Amani Cottage — Grounds Sprinkler Irrigation & Upkeep

Lawn rotary sprinkler irrigation and grounds moisture maintenance

Overseen by: **Edwin & Grounds Team**

Lawn Sprinkler Irrigation Operations

- **Rotary Sprinkler Lawn Irrigation:** High-coverage rotary sprinkler irrigation systems deployed across the front lawn, ornamental planting beds, and surrounding grounds to ensure optimal soil moisture and sustain lush turf growth.
