

# Daily Operations & Project Summary

Comprehensive overview of site development, livestock care, and facility maintenance.

## GOLF PROJECT

### Green 4 & 9

Design, levelling & fertilizer

## DAILY MILK PRODUCTION

### 6.5 Litres

Morning: 4.5L | Evening: 2L

## CANINE TRAINING

### 4 Drills

Walking, Paw, Obedience

## CANINE HEALTH

### 2 Monitored

Coby resting · Logan treated

## 1. Golf Project (Mucheru World of Golf)

Green design & levelling, upcoming green preparation, sand delivery, and fertilizer packing

Overseen by: **Ken**

### Construction & Design Progress

- **Designing & Levelling Green No. 4 and Green No. 9:** Precision design work and surface levelling was carried out on both greens to achieve the required contours and gradients.
- **Preparation for Next Greens:** Joe began preparations for the upcoming **Greens 1, 2, and 3**, including site assessment and layout planning.
- **Sand Delivery:** One full lorry of sand was delivered to the project site for use in green construction and layering.
- **Fertilizer Packing:** Fertilizer was measured and packed in preparation for application on the greens. **Willy** assisted with the packing work.

### Site Work & Deliveries Visual Documentation

### Green No. 4 — Levelling & Design

Surface grading and contouring work on Green 4.

### Green No. 9 — Levelling & Design

Surface grading and contouring work on Green 9.

### Design & Levelling Progress (1)

Workers shaping the green surface.

### Design & Levelling Progress (2)

Continued grading and precision levelling.

### Design & Levelling Progress (3)

Final surface shaping across the green area.

### Preparing for Greens 1, 2 & 3

Joe assessing and planning the next phase of green construction.

### Sand Delivery (1 Lorry)

Full lorry of sand received on site for green construction.

## Fertilizer Packing

### Fertilizer Packing

Fertilizer being measured and packed for application.

### Fertilizer Packing (Detail)

Close-up of the packing process.

### Fertilizer Packing (Progress)

Additional batches packed and ready for use.

### Packed Fertilizer — Ready

All fertilizer batches packed and stored for application.

## 2. Farm Activities (Chaka Farms)

Dairy production, goat shed maintenance, and canine care

### Goat Shed Maintenance

Overseen by: **Mwangi**

- **Goat Shed Cleaning:** The goat shed was thoroughly swept and cleaned to maintain a hygienic environment for the livestock.

### Goat Shed Cleaning

### Goat Shed Cleaning

Thorough sweeping of the goat shelter.

### Goat Shed Cleaning (Detail)

Interior cleaning of the goat pen area.

**Goat Shed — Clean & Ready**  
Shed fully cleaned and prepared for the livestock.

 **Dairy Production**

Overseen by: **Ken**

- **Milk Production Summary:**
  - • **Morning Yield:** 4.5 litres
  - • **Evening Yield:** 2.0 litres
  - • **Total Daily Milk Collected:** 6.5 litres

 **Canine Health & Training Update**

Overseen by: **Willy**

- **Dog Health Check-up:** Routine check-up completed on all dogs. All are in good health except **Logan**, who is receiving treatment.
- **Kennel Sanitation:** All kennels were cleaned and dogs were served with fresh, clean water.
- **Off-Leash Walking:** Morning walking session completed off-leash — all dogs performed well.
- **Paw Commands:** Morning session completed — all dogs are performing paw commands perfectly.
- **Obedience & Commands:** All dogs are obeying commands well, except **Zara** who remains playful and needs continued practice.

 **Canine Health Updates**

**Coby:** Still not participating in training sessions but is healing well and continues to be monitored.

**Logan:** The wound has migrated from the front leg to the back left leg. The wound is being washed with antiseptic solution and **Dermazine cream** has been applied for treatment.

 **Canine Health — Logan Wound Documentation**

### **Logan — Wound Assessment**

Wound on back left leg cleaned and treated with Dermazine cream.

**Compiled by Dennis Ndirangu**
