

# Chaka Farms - September Milk Summary

EXECUTIVE BRIEF

Monthly Dairy Production & Sales Reconciliation

September 2026 (Full Month)

## OPERATIONAL CLARIFICATION

In earlier daily reports, the morning and evening numbers recorded by Kamandau were treated as the total milk produced. However, those numbers actually represented the milk **sold**. The 2 litres given daily to the goat kids and staff were shared on the farm in addition to what was sold. **Bottom Line:** No milk was lost. The cows actually produced **2 litres more per day** (54.5 litres more in September) than previously reported, and all milk is 100% accounted for.

### TOTAL MILK PRODUCED

215.0 L

Daily Average: 7.2 Litres / day

### COMMERCIAL MILK SOLD

160.5 L

75% of total monthly harvest

### USED ON THE FARM

54.5 L

Kids (29.0L) · Staff & Security (25.5L)

## September Weekly Overview

Summary by 7-day period

| PERIOD                             | MILK SOLD | USED ON FARM | TOTAL PRODUCED |
|------------------------------------|-----------|--------------|----------------|
| Week 1 (1st – 7th September)       | 46.0 L    | 11.0 L       | 57.0 L         |
| Week 2 (8th – 14th September)      | 37.0 L    | 13.5 L       | 50.5 L         |
| Week 3 (15th – 21st September)     | 34.0 L    | 13.0 L       | 47.0 L         |
| Week 4 (22nd – 28th September)     | 34.0 L    | 13.5 L       | 47.5 L         |
| Final Days (29th – 30th September) | 9.5 L     | 3.5 L        | 13.0 L         |
| SEPTEMBER TOTAL                    | 160.5 L   | 54.5 L       | 215.0 L        |

### EARLIER DAILY REPORTS

Showed **160.5 Litres** total (treating milk sold as total yield, and subtracting farm rations to show an artificial paper balance of 106.0L).

### ACTUAL RECONCILED OUTPUT

The herd actually produced **215.0 Litres**. All 160.5L of commercial sales were delivered, and 54.5L fed the goat kids and supported farm staff.
